

HEAVY RAINFALL FORECAST BULLETIN No: 20261207

CATEGORY OF FORECAST: ALERT

ISSUED ON 12TH July, 2026

Valid: From 00:00 UTC on 13TH July 2026 to 23:59 UTC on 13TH July 2026.

1.1 INTERPRETATIONS

July 13, 2026: Light to moderate rainfall is anticipated over Liberia, affecting Lofa, Gbarpolu, Grand Cape Mount, Bomi, Montserrado, Bong, Nimba, Margibi, Grand Bassa, River Cess, Sinoe, Grand Gedeh, River Gee, Grand Kru, and Maryland counties (Fig. 1: Areas in Yellow and orange). **Heavy Rainfall** is expected over northern and southern Liberia, affecting Grand Cape Mount, Bomi, Montserrado, Margibi, Grand Bassa, and the extreme north of Lofa and Nimba Counties (Fig. 1: Areas in Red).

July 14, 2026: Light to Moderate rainfall is expected over Grand Cape Mount, Montserrado, Margibi, Grand Bassa, Sinoe, River Gee, and Grand Kru counties (Fig.2: Yellow and Orange). **Heavy Rainfall** is expected over Grand Cape Mount, Montserrado, Margibi, Grand Bassa, Sinoe, River Gee, and Grand Kru (Fig. 2: Areas in Red).

July 15, 2026: Light to Moderate Rainfall is expected over Bomi, Lofa, Bong, Grand Bassa, Nimba, Grand Gedeh and Maryland counties (Fig. 3: Areas in Yellow and Orange). **Heavy Rainfall** is expected over Bomi, Lofa, Bong, Grand Bassa, Nimba, Grand Gedeh, and Maryland counties (Fig. 3: Areas in Red).

1.2 CAUTION

There is a risk of flash flooding due to expected moderate-to-heavy rainfall. Strong winds may accompany the rains. The public is advised not to drive through surface runoff waters, as they can have strong undercurrents. Other likely hazards include slippery road surfaces and reduced visibility during the rain, which can disrupt road traffic. Strong winds are a threat to weak structures, trees, and masts. Disconnect electrical appliances before, not during, the rains. Elsewhere (see places in Green), no hydrometeorological hazards are anticipated. The public is, however, advised to watch out for updates.

Follow the Liberia Meteorological Service (LMS) for more updates.

LEGEND AND ITS INTERPRETATIONS

LIKELIHOOD	≥ 60%		2	6	10
	≥ 40%		1	5	9
	≥ 20%			4	8
	≥ 10%			3	7
		Very light	Light	Moderate	Heavy
IMPACT					

S/N	Range	Category
1.	< 5mm	Very Light Rainfall
2.	5 – 10mm	Light Rainfall
3.	10 – 15mm	Moderate Rainfall
4.	> 15mm	Heavy Rainfall

1: Probability between 40 and 60% to have a cumulative rainfall between 10 and 20 mm in 24 hours

2: Probability of more than 60% to have a cumulative rainfall between 10 and 20 mm in 24hours

4: Probability between 20 and 40% to have a cumulative rainfall between 20 and 50 mm in 24 hours

5: Probability between 40 and 60% to have a cumulative rainfall between 20 and 50 mm in 24 hours

6: Probability of more than 60% to have a cumulative rainfall between 20 and 50 mm in 24 hours

8: Probability between 20 and 40% to have a cumulative rainfall greater than 50 mm in 24 hours

9: Probability between 40 and 60% to have a cumulative rainfall of greater 50 mm in 24 hours

10: Probability of more than 60% to have a cumulative rainfall greater than 50 mm in 24 hours
