Sat 27 Dec 2025
18:00

Onset:

Sat 27 Dec 2025
18:00

Expires:

Sat 27 Dec 2025
22:00

Area:

Areas at greatest risk include coastal and south-c

Description:

A well-organized squall line is currently affecting southern Liberia and is moving eastward. This system is associated with intense thunderstorms, capable of producing strong to damaging winds, heavy rainfall, frequent lightning, and localized flooding.

Instruction:

General Public • Remain indoors during thunderstorms and avoid open areas. • Do not shelter under trees or near tall objects during lightning activity. • Secure loose items around homes to reduce wind damage. • Avoid walking or driving through flooded roads.

Motorists • Reduce speed and use headlights during heavy rain. • Be alert for fallen trees, power lines, and poor visibility.

Coastal & Marine Communities • Small fishing boats and canoes are strongly advised to remain ashore. • Mariners already at sea should seek safe harbor immediately.

Farmers & Field Workers • Suspend field activities during the passage of the squall line. • Protect harvested produce and farming equipment from heavy rain and wind.
